

Aftercare/Relapse Prevention Program

This Program was designed to support those that are either continuing their care after completing Substance abuse treatment or for the recovering addict that feels they need some additional support and guidance to prevent a possible relapse. For the person that is already in recovery, but has found there are certain issues that are either getting in the way of their serenity and happiness or are exhibiting some behaviors that are not conducive to ongoing recovery we have the program for you ! Like all our programs we gather all pertinent clinical data to create a personalized relapse prevention program to suit your Individual needs and individual goals.
